

### **Growing Bromeliads in the Home and Garden**

Bromeliads typically have bright red, orange, purple, or blue flowers, but with more than 2,700 species the choices are boundless.

We're delighted to have Pamela Hyatt—an expert grower, hybridizer, and longtime champion of bromeliads as our August Garden Club speaker. In 1981 Pamela founded “Bird Rock Tropicals”, a specialty nursery in Southern California known for its extraordinary collection of bromeliads, tillandsias, and orchids.

Pamela will share her knowledge and enthusiasm in a program on Growing Bromeliads. She'll introduce us to the beauty and diversity of the bromeliad family, showcase some stunning examples, and provide practical care tips to help you grow these striking plants successfully in your home or garden.

Following the presentation, Pamela will also be offering some of her gorgeous plants for purchase.

**Event Details: Wednesday August 13, Abravanel Hall, social time: 9:30 am and the meeting starts at 10 am.**

Join the Garden Club for just \$10 per year -- sign up at any meeting. Be sure to stop by the Share Table for gardening treasures. We look forward to seeing you!
